

ansible

- 安装

```
# 安装
yum install epel-release
yum install ansible
```

- 配置hosts

```
# 编辑hosts
vi /etc/ansible/hosts

# 配置
[groupName]
192.168.0.10
10.vpclub.io

192.168.0.11 ansible_user=<name>, ansible_password=<passwd>

# 配置
# ansible_port 22
# ansible_user root
# ansible_password 123456
```

- 生成密钥

生成ansible密钥

```
# 生成RSA密钥
ssh-keygen -t rsa
```

```
# [redacted]
```

```
ssh-copy-id -i ~/.ssh/id_rsa.pub root@192.168.1.2
```

- [redacted]

```
ansible all -m <[redacted]> -a "[redacted]"
```

```
ansible groupName -m <[redacted]> -a "[redacted]"
```

```
ansible 10.vpclub.io -m <[redacted]> -a "[redacted]"
```

```
[redacted] #5
```

```
[redacted] [redacted] 10 [redacted] 2023 05:59:33
```

```
[redacted] [redacted] 22 [redacted] 2024 17:53:23
```
