

# hbuilder和vue和jenkins uniapp

安装vue cli和uniapp

```
npm install --location=global @vue/cli@4 --registry=http://registry.npmmirror.com

vue create -p dcloudio/uni-preset-vue my-project
```

运行hello uni-app

运行

```
# 运行
npm install --registry=http://registry.npmmirror.com
npm run dev

# 运行src
# 运行
# .git package.json package-lock.json node_modules vue.config 运行
# 运行package.json运行package.json
# 运行
npm run dev
```

# node-sass

node-sass

```
"devDependencies": {
  "sass": "^1.70.0",
  "sass-loader": "^10.0.0",
}
```
