python facefusion.py [commands] [options]

options:
  -h, --help                                    show this help message and exit
  -v, --version                                 show program's version number and exit

commands:
    run                                         run the program
    headless-run                                run the program in headless mode
    batch-run                                   run the program in batch mode
    force-download                              force automate downloads and exit
    benchmark                                   benchmark the program
    job-list                                    list jobs by status
    job-create                                  create a drafted job
    job-submit                                  submit a drafted job to become a queued job
    job-submit-all                              submit all drafted jobs to become a queued
jobs
    job-delete                                  delete a drafted, queued, failed or
completed job
    job-delete-all                              delete all drafted, queued, failed and
completed jobs
    job-add-step                                add a step to a drafted job
    job-remix-step                              remix a previous step from a drafted job
    job-insert-step                             insert a step to a drafted job
    job-remove-step                             remove a step from a drafted job
    job-run                                     run a queued job
    job-run-all                                 run all queued jobs
    job-retry                                   retry a failed job
```

```
job-retry-all                                retry all failed jobs
```
